DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to the use of traffic scheduler, classified in class 370, subclass 395.4.
- II. Claims 20-77, drawn to the reservation of resources, classified in class 709, subclass 226.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, such as the scheduling and forwarding of traffic based on certain criteria, which may be performed separately from the other invention. This constitutes the assignment of certain information to be transmitted. Invention II implements the reservation of resources, based on a request to do so. This teaching may be implemented separately from invention I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2145

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
